CERTIFIED BY
SCS Global Services

The Chimewood Collection is our signature luxury vinyl tile flooring that features authentic design, natural color, and realistic texture that recreates the beauty of real hardwood.

The collection is Floorscore certified for low VOC providing an environmentally friendly option for flooring applications both commercial and residential.

The collection features a hinge to ensure a seamless water proof installation.

Maintenance Guide for SPC Flooring

(The information below was provided by the manufacturer)

- Regularly sweep the floor to remove loose dirt or grit as these can cause fine scratches.
- For a thorough clean, a range of pH neutral cleaning products are available. Avoid the use of regular household cleaners and bleach-based detergents. These could make the floor slippery or cause discoloration.
- Always mop up spills as soon as possible, to reduce the risk of slipping and possible staining.
- Use entrance mats to protect against grit and moisture. Ensure they are of non-staining variety (not rubber-backed) to prevent any discolouration of the floor.
- Avoid sliding or dragging furniture or other objects across the floor - use floor protector pads to prevent scratching.
- Use large castor cups or other means to protect against indentation from heavy furniture.
- Maintain room temperature between 65-85°F* (18-27°C) for optimum performance.
- Do not subject this product to standing water. This this will present a slip hazard.
- Care must be taken when using underfloor heating to avoid damage to the floor caused by localised 'hot spots/thermal blocks'. Care must also be taken in placing rugs, and items of furniture which do not allow hot air circulation.

ASTM standards require installation in range 65-85°F; elsewhere the temperature should be 18-27°C.

** Where the flooring run exceeds 50 ft. (15 m) in width or length, a 5/16" (8 mm) expansion joint should be used and repeated thereafter.
